Background and Discussion:

The Office of the County Engineer continues to deliver projects to reduce the risk of flooding within subdivisions caused by ineffective stormwater drainage facilities in those subdivisions, improve mobility, and provide community improvements. These Drainage Infrastructure Improvement specific federally compliant retainer on-call agreements support this effort. Six of these retainer on-calls (AECOM Technical Services, Inc., HDR Engineering, Inc., Huitt-Zollars, Inc., IDS Engineering Group, Jacobs Engineering Group, and Ward, Getz and Associates, Inc.) are being actively utilized to deliver professional engineering design and construction phase services for federal Hurricane Harvey Community Development Block Grant - Disaster Recovery (CDBG-DR) funded subdivision drainage projects at present, and the ability to access federally compliant professional engineering services will help ensure prompt delivery of any such additional work should the opportunity arise.

Presented to Commissioners Court

July 19, 2022

Expected Impact:

Successful completion of these projects will help Harris County residents by reducing their risk of flooding within the subdivision and improving mobility and safety.
